PRESS RELEASE

Catch Cloths Provide a Cleaner Environment

American Fabric Filter Co., Wesley Chapel, FL, manufactures catch cloths of 18 gauge vinyl for installation under conveyors in the food processing and baking industries. Catch cloths prevent errant product from dropping onto other lines or being transferred throughout the plant; they facilitate plant cleanup by confining spillage in one area. AFF offers catch cloths with custom sizing and grommet placement to fit beneath any conveyor. We can duplicate straights, 45° and 90° turns, S-curves, as well as add dump chutes or funnels for high volume applications.

American Fabric Filter also provides catch cloth installation service. We will visit your site to measure for cloths, quote, and install, working around your schedule to reduce downtime while maintaining a sanitary environment.
