PRESS RELEASE

Drum Top Dust Collector Bags

American Fabric Filter Co., Wesley Chapel, FL, can maximize the performance of your container-topped dust collector. The most cost-effective way to increase suction and reduce the amount of dust in your shop is to replace the 30 micron woven OEM bag with an oversized AFF felt bag. The added fabric surface area exhausts all the air (CFM) without creating back-pressure to increase fan output and still contain virtually all the finest dust.
