PRESS RELEASE

Increased Durability and Bag Life

American Fabric Filter Co., Wesley Chapel, FL, now uses scrim supported felt exclusively in our continuing effort to improve the quality and life of the filter bags we manufacture. Not only does scrim add strength to the fabric for greater durability, but provides increased support and static conductivity as well. Bags made from fabric with supporting scrim can better withstand abrasive dust and frequent cleaning, extending the life of the bag. Scrim supported felts are available in a variety of weights and finishes (singed, glazed, etc.) to address specific dust types.
