

# American Fabric Filter Co.

Your ultimate source for dust bags, screens and rubber products!

## Replacement Sifter Screens

### Sifter replacement screens and screening

Replacement screens can be made from wire or synthetic clothing, to fit virtually any sifter.

Compare our quality and pricing

We have reels made for centrifugal sifters such as Prater, Kemutec, and Kason. Custom color coding is also available for easy size identification and installation.

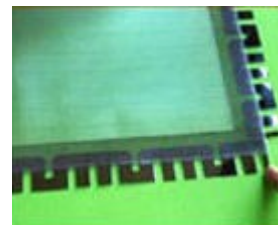

Our inventory includes screens for Gump, Rotex, Great Western, Alto and other sifters. Screens can be custom made for unique applications.

Check with the sifter experts before placing your next screen order. We offer free technical assistance with mesh selection, edge, seam treatment, and more. We want our products to give you optimal performance!

### Did a rip in a sifter screen just bring your production line to a complete halt?

Your first thought is *how fast can it be re-screened?* American Fabric Filter Company's power screen stretcher provides faster and better repairs. How well a sifter screen is stretched is just as important as how fast you can get it repaired. To ensure correct and consistent mesh size in a sifter screen, the fabric must be stretched uniformly in both length and width at the appropriate tension.

AFF's power stretcher uses pneumatically balanced stretcher bars to evenly apply bi-directional pressure across the fabric and give you the precise mesh openings you require. Frames up to four feet square are re-screened in as little as one day with most stock synthetic and stainless steel fabrics. AFF manufactures and repairs screening products for all industries. Rush service is available.

Call, fax or e-mail us for a no-obligation evaluation of your equipment's performance and a free quote.
